

Nexus-e

H2-based Super Charger.

100% HYDROGEN-
BASED SYSTEM

Your solution for e-mobility:
regenerative power with
zero emission, completely
mains-independent.

The first off-grid & stand-alone charging system
for the new generation of electric vehicles.

Nexus-e

H2-based Super Charger.

YOUR SOLUTION FOR E-MOBILITY.

The demand for electric charging stations is imminent, for a zero carbon footprint and to avoid national grid over load, hydrogen fuel cells will be deployed in the charging stations to supply the required electric load without undue pressure on the national grid.
